ANTI-SLIP PROFILE WIRE

for Drainage, Walkways & Wet-Area Safety

Stainless steel anti-slip profile bars feature diamond-knurled, raised-rib or dimpled surfaces for the fabrication of drainage grates, trench covers and wet-area flooring systems. Base profiles, surface patterns and dimensions can be customized according to drawings.

Advantages

Integrated Anti-Slip Surface

The anti-slip pattern is formed directly on the profile surface.

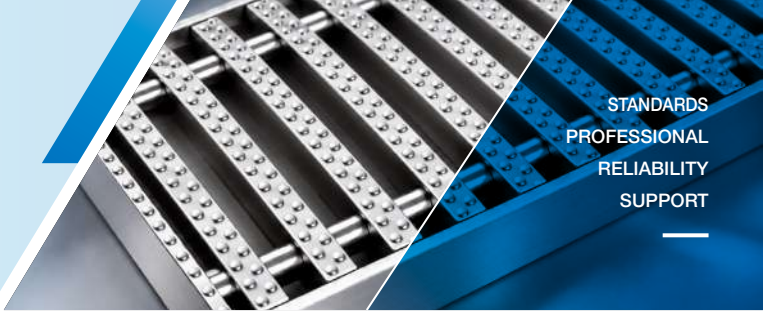

Multiple Surface Patterns

Knurled, raised-rib and raised-dot patterns are available for different grating designs.

Suitable for Grating Fabrication

Profile geometry and supply form can be selected to suit subsequent cutting, joining and grating assembly.

Surface Pattern Options

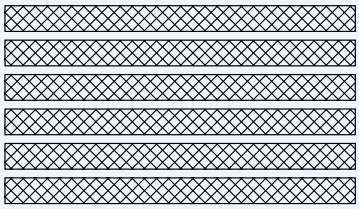

Diamond-Knurled Profile Bar

DURABLE SURFACE / EXCELLENT ANTI-SLIP PERFORMANCE

STANDARDS | PROFESSIONAL | RELIABILITY | SUPPORT

Material Options

MATERIALS FOR DIVERSE ENVIRONMENTS

Material Grade	Selection Guidance
Stainless Steel 304	General drainage, pedestrian and architectural grating applications
Stainless Steel 316	Wet, chloride-containing and more corrosive environments
Stainless Steel 316L	Low-carbon grade suitable for welded assemblies in corrosive environments
Other Grades	Available subject to material and production confirmation

Applications

RELIABLE SOLUTIONS FOR A WIDE RANGE OF PROJECTS

Drainage Grating

Used as bearing profiles in fabricated trench and linear drainage grating.

Commercial Kitchens and Processing Areas

Used in drainage grating for frequently washed food-processing and kitchen areas.

Industrial Access and Service Areas

Used in fabricated grating for platforms, pits and maintenance access areas.

Bathrooms, Balconies and Building Entrances

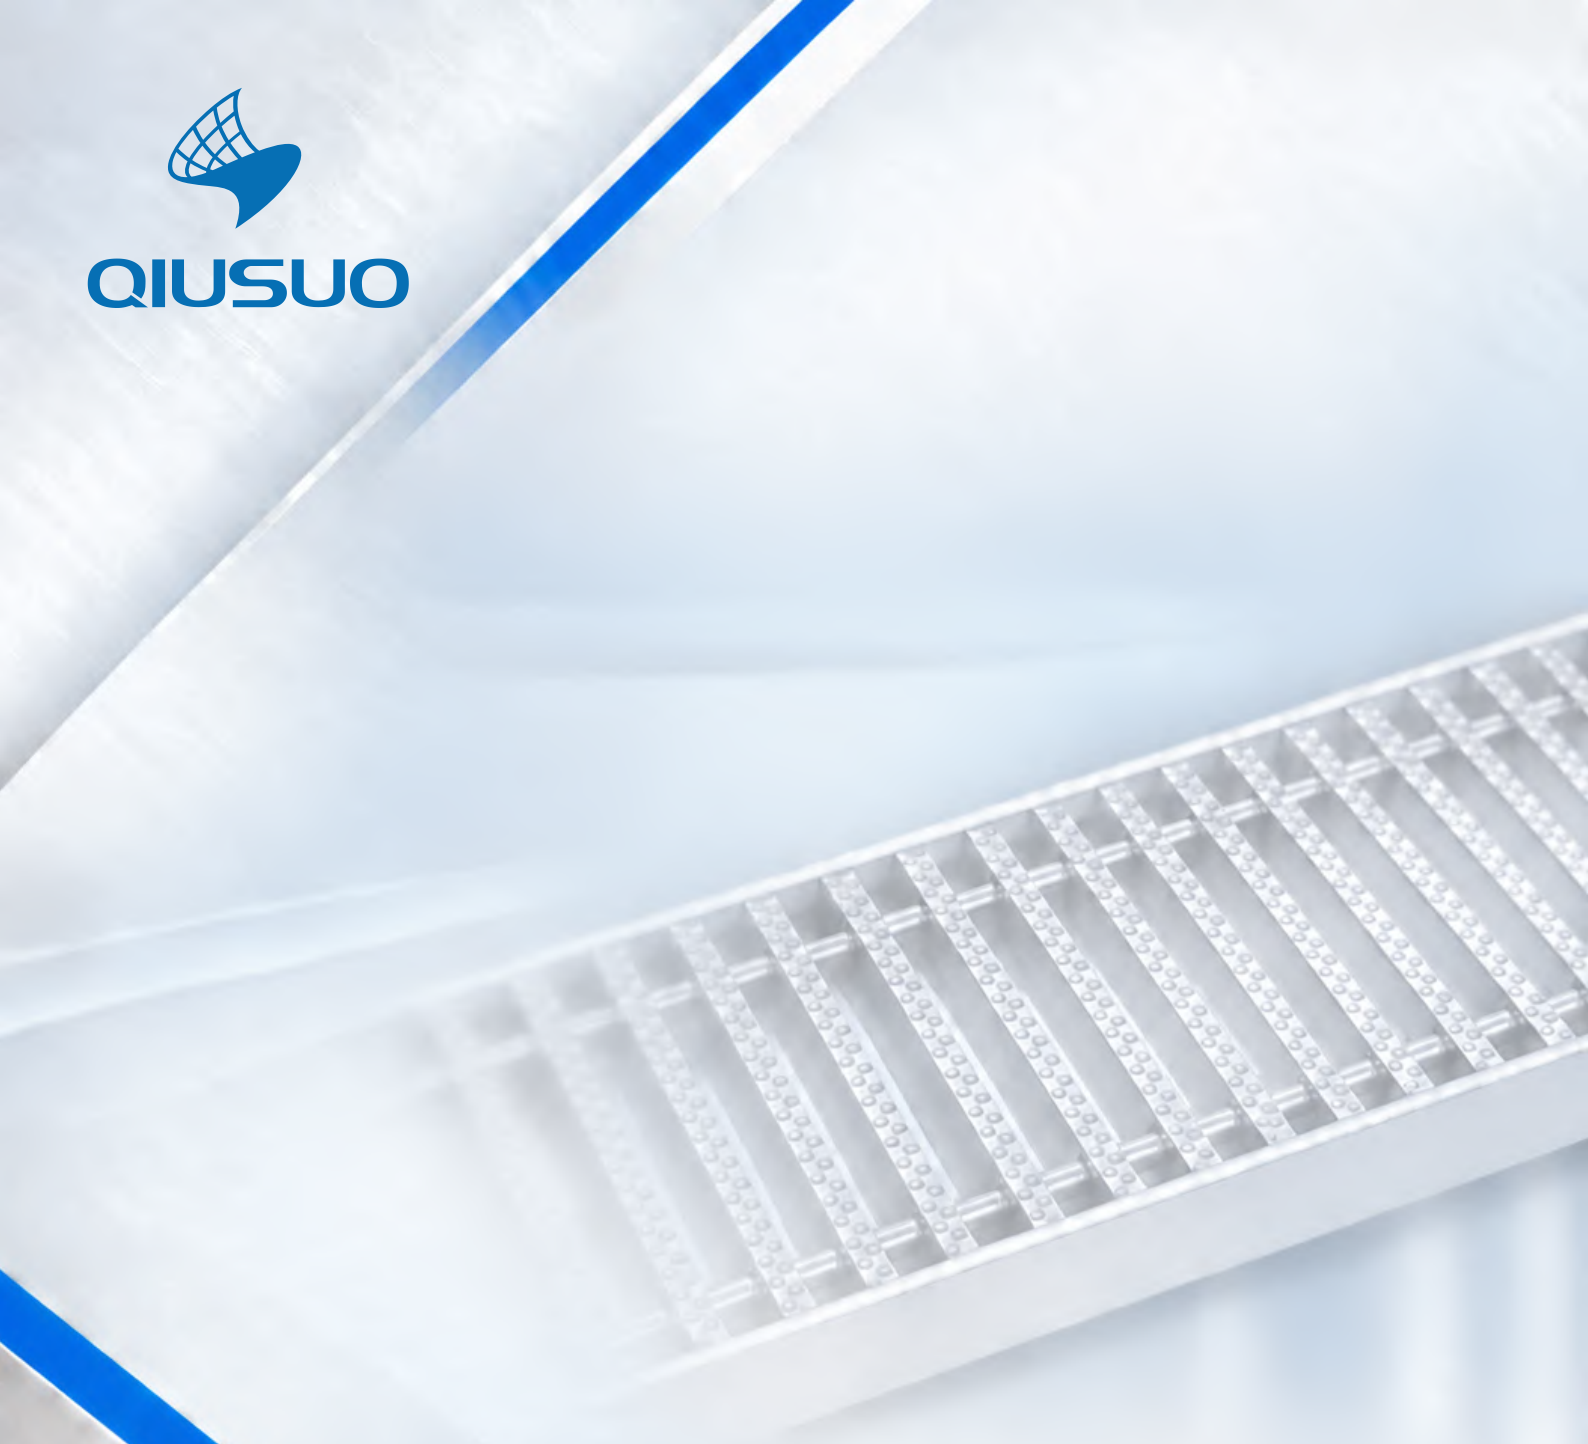

Used in drainage covers for wet pedestrian areas and building thresholds.
